

## *International energy info available at the desktop*

OE Federal and contractor employees can now access millions of citations to international energy information from two large international information exchange agreements, free of charge, from their desktops. These arrangements are courtesy of the Department's Office of Scientific and Technical Information.

While the databases aren't new, desktop access is.

Information about energy research and development results, environmental impacts of energy production and use, energy policy, energy conservation information and

many other topics are available at the Energy Technology Data Exchange. This is a large international information exchange hosted by the International Energy Agency. Check out the site at **<http://www.etde.org/> ETDEWEB.**

ETDEWEB provides access to more than 600,000 bibliographic citations of reports, journals, conferences and books and more than 3.5 million pages of full text. It is fully searchable and available full text documents can be downloaded. Register your user ID and password at **[http://www.etde.org/etdeweb/us\\_reg.html](http://www.etde.org/etdeweb/us_reg.html)**.
